The critical path of the network diagram is:

C01-60 -> C01-67

How to ensure sprint is on track:

We identified the critical path and made sure that the tasks on the critical path were prioritized. We also made sure that the tasks on the critical path were assigned to the team members with the most experience in the area.

We maintained frequent communications with the team members to ensure that they were on track with their tasks. We also made sure that the team members were aware of the critical path and the importance of the tasks on the critical path.

We utilized the agile principles and practices such as daily standups and sprint planning to make adjustments to the sprint plan as needed.

In case you were unable to finish:

We finished all the tasks on the critical path and the sprint was completed successfully.
